## GO FOR THE HEAD

Welcome, fellow adventurer! You have stumbled upon a mysterious URL:  
<https://dotheimpossible.onrender.com/findme?code=World>. What secrets could it hold?

**Hello World**

Keep TRYIN!!!! , TRY HARD

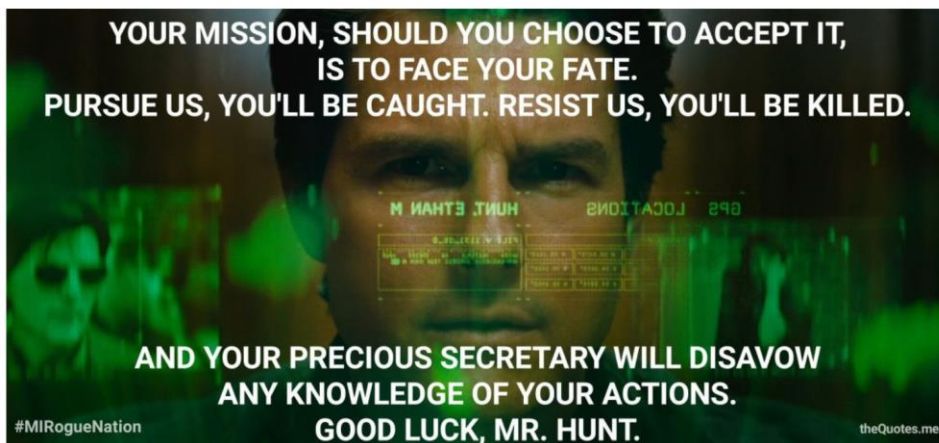

Well, let's start by trying to crack the code! What happens if we brute force the URL parameters and change "World" to "imf"? Suddenly, the page content changes. Ooh, we're getting somewhere!

---

**Hello imf**

Yayyyyyyyyyy YOU FOUND IT!

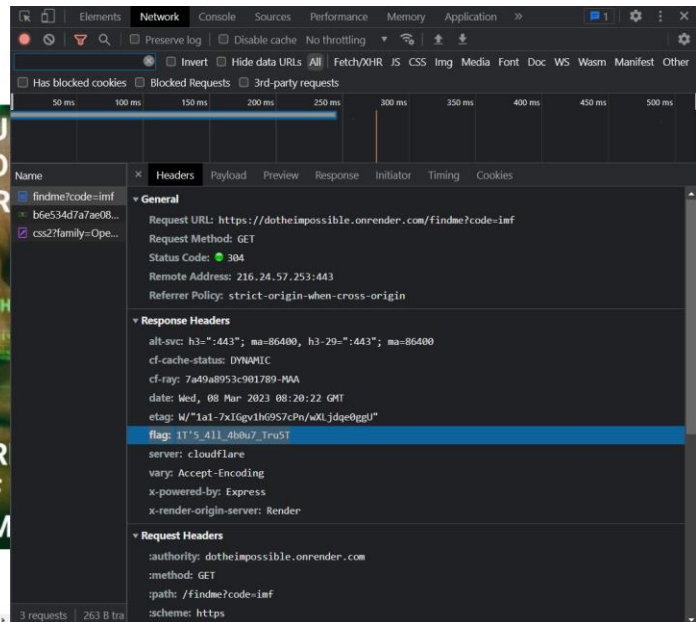

But we're not done yet. As the challenge name suggests **GO FOR THE HEAD**

if we check the headers of that particular request in the network tab, we'll find the flag we seek. This is like a treasure hunt, but with way less digging and way more computer skills.

Hello imf

Yyyyyyyyyyy YOU FOUND IT!

So, let's put our hacker hats on and start exploring. Who knows what other surprises this URL may have in store for us? Maybe we'll uncover a secret society of coders or a hidden message from aliens. Or maybe we'll just find a cool flag. Either way, let's do the impossible and see where this journey takes us!

FLAG: **NOVA{1T'S\_41l\_4b0u7\_TrU5T}**
